# SHUTTERS

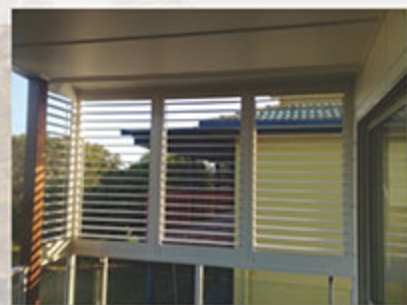

with flyscreening on outside

## SHUTTER FEATURES

Ossie O aluminium shutters for patios, balconies, outdoor dining areas, verandas, carports, internal or external window furnishings.

Ossie O shutters can be utilised as a sun, wind, privacy and insect control. Outdoor areas can be fully secured with a comprehensive range of locking systems.

## PRODUCT INFORMATION

### PAW PROOF LITE INSECT MESH

Paw proof lite insect screen is a vinyl coated polyester mesh, it is a heavy duty insect screen that is ideal for use in high traffic areas. Pet resistant and tear and puncture resistant, it is 3 times stronger than regular insect screening. This mesh is excellent for use in patio and screen enclosures as well as windows and doors. It installs like regular insect screening. Safety: This mesh has a bursting strength of 305lb per square inch. The Paw proof lite screen is ideal when added strength and durability are required. Paw proof lite works great in second story and balcony applications. The superior strength eliminates damage caused by wind blown debris and will hold up to the strongest winds and weather conditions. The tensile strength and tear resistance make this the perfect solution to damage by life's obscure screen destroyers. Its visibility and strength make it ideal for porch and patio applications.

### SUNSCREEN MESH

Sunscreen mesh is a PVC coated polyester which has great versatility usage, this mesh will block out 95% of the UV rays and 90% of wind and rain, whilst still keeping out insects as well. It carries a 5 year warranty on normal usage (not on misuse eg cutting mesh etc). The sunscreen has a 2 x 2 weave and is fire retardant. This is ideal for patios, enclosures and privacy screening.

### PVC CLEAR and TINTED

Ossie O offers PVC Clear or tinted, both these are identical in composition. PVC is susceptible to degradation due to exposure to ultra-violet light and pollutants in the atmosphere, but these 2 types have the added UV inhibitors. The PVC used in our Rollaways is of the highest grade and can offer up to 70% UV protection, which provide the added benefit of protection from sunburn and cancer causing radiation. PVC is used extensively for enclosures and patios. This material may have up to 5% defects.

### LIFETIME SUPPLY OF CLEANING PRODUCTS

Ossie O take pride in the installation of all their products, our experienced installers will leave your outdoor area in a neat and tidy manner, we even clean your awnings and with each PVC café awning installed you will receive a lifetime supply of cleaning agent to keep them looking great. All existing PVC awning clients are welcome to call into our showroom and pick up their supply.
